HTML  
Javascript  
jQuery

## EXPERIENCE

### SOFTWARE DEVELOPER

Nashville Software School | 2020-2021

*A non-profit corporation, providing intensive accelerated software development education programs.*

- First half of the program prepares students to work on building the front-end code associated with websites, web apps and hybrid mobile applications. We focus on the 3 standard languages of the web: HTML, CSS and JavaScript.
- Second half of the program covers the general software engineering and server-side development concepts, such as test-driven development, object-oriented programming, pair programming, source code control in a team environment, common code patterns, SQL database access, etc. My program specifically taught these concepts in the context of the C# programming language and associated technology stack .NET.

### BUSINESS ANALYST

TEKsystems | 2016

*An information technology and services recruiting organization, working to bring the appropriate expertise and talent to provide solutions for their clients.*

- Modernized computer applications at the TN Department of Human Services in order to help DHS users be more effective in their roles
- Wrote and managed business requirements and technical specifications
- Managed project commitments and metrics
- Acted as the Scrum Master for the development team

### BUSINESS ANALYST & PRODUCT MANAGER

UL Workplace Health & Safety | 2011-2016

*A business unit of Underwriters Laboratories, providing software programs and e-learning training to help improve the safety of workers across diverse industries.*

- Worked with customers, support, sales, marketing, solutions consultants, and the management team to define the product roadmap
- Managed the end-to-end Product Management process that spans market needs identification to product development to product launch and support
- Planned release schedule, deliverables, goals, and milestones
- Defined requirements
- Collaborated with the development, QA, documentation, and engineering teams to ensure product roadmap items were implemented successfully
- Designed and maintained project documentation
- Provided support to Sales (helping with RFPs, participating on customer and prospect calls, conducting demos, and providing roadmap information)

### TECHNICAL WRITER

Epic Systems Corporation | 2005-2010

*Provider of healthcare software, offering a centralized site for all of a patient's information*

- Wrote and reviewed a wide variety of technical documents: development release notes, user guides, online help, quick start guides, training companions, design specifications, and test scripts
- Contributed to developing a new strategy for enhanced reporting documentation tools
- Contributed to a major revamp of the online help system
- Led customer training sessions on using documentation deliverables and documentation management tools
- Provided onsite go-live assistance and conducted user training sessions
